

FileDocumentProvider

```
classDiagram
    class FileDocumentProvider {
    }
    class XMLDocumentProvider {
        # createDocument()
    }
    FileDocumentProvider <|-- XMLDocumentProvider
```

The diagram illustrates a class hierarchy. At the top is the 'FileDocumentProvider' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name, while the other two are empty. Below it is the 'XMLDocumentProvider' class, represented by a shaded rectangle with three horizontal compartments. The top compartment contains the fully qualified class name 'com.chaintronics.the78mole.reqtool.editors.XMLDocumentProvider', the middle compartment is empty, and the bottom compartment contains the method signature '# createDocument()'. A blue arrow with an open triangular head points from the top of the 'XMLDocumentProvider' class to the bottom of the 'FileDocumentProvider' class, indicating that 'XMLDocumentProvider' inherits from 'FileDocumentProvider'.

com.chaintronics.the78mole.reqtool.editors.
XMLDocumentProvider
